Professional designer and woodworker Jim Makowicki's 22-project collection reflects uncanny historical detail and

technical accuracy. Each ingeniously designed toy is a potential family heirloom, as a plaything or for display. Makowicki's sophisticated toy designs are extraordinary. Some Making Heirloom Toys projects have over 50 pieces; one, a handsome ferry boat complete with vintage vehicles has over 100. There are simpler toys, too, all suited to the average woodworker's skills. Projects are meticulously researched and include scale drawings that can be copier-enlarged into full-size working plans. Readers get step-by-step details, including safety, design and finishing information. Projects are mostly transportation toys: cars, trucks, airplanes, trains, boats and more.

From the Back Cover Jim Makowicki's wooden toys show an attention to detail and sophistication of design that set them apart from the usual run-of-the-mill toy projects. This collection of toys includes 22 projects, primarily featuring transportation toys (cars, trains, trolleys, planes and boats) and educational toys. For each project, there's a full-page photo of the toy, detailed drawings and patterns, a parts list, construction photos and clear, step-by-step instructions on how to make the toy. A color gallery shows the finished toys in all their glory. Two introductory chapters explain the fine points of toymaking techniques, with helpful hints on working with small parts and choosing the best finish for your toy. Whether you're making a toy to entertain a child or grace a desk, this book will teach you how to create toys that your family will cherish for generations.
