This beautiful anthology marks the 25th anniversary and 100th issue of Model Shipwright, the leading ship model publication, and is a choice compendium of some of the journal's finest articles. Launched in 1972 in response to the demand for a periodical which would target the serious ship modeller, Model Shipwright has since produced a range of highly authoritative articles on the craft of ship modelling. For 25 years, this quarterly journal has faithfully attested the skill and artistry of model shipcraft, providing expert research material, and documenting the many advances in

ship building. The journal has not only proved essential reading to the ship modeller, but stands as a significant contribution to maritime history as a whole. John Bowen is the editor of Model Shipwright.
