This book is a joke. I was very disappointed; there are no recipes in it. It just talks about the basics of making essential oil fragrances; it's only about 12 pages long. If you read the other reviews, you can see they were all done in October 2016, not enough time to determine if the so called recipes actually smell good. Probably friends of the author. Also, extremely poor editing! For instance, a sentence uses 10 when it should have used the word tin. There are errors like this throughout the book. Don't waste your time or money! The only good thing is I didn't pay for shipping.

Worthless! Doesn't anyone making Kindle books use proof readers? Constant misspelling, bad grammar, repetitive sentences, words or ideas. No recipes at all. Simply a worthless book.

This isn't a book; it's a half-baked, amateurish essay full of grammatical errors and no real information. So disappointing it actually made me angry. Shockingly bad - a scam, really.
