I read this book in 5 minutes. I am very disappointed. I cannot believe 5 people gave this a positive review. I live in a remote country and I had to wait for months for a friend to bring this to me. It has 2 pages of introduction and 2 pages of conclusion. 4 recipes that are the same 1/4 page of instructions repeated after a list of ingredients. There is a lot of opinion, very little facts and no more information than you'll find on a google search. This is worth \$2, not \$8 something. I want my money back and I want a REAL book! This is a print at home flimsy pamphlet.

Very disappointed with this book! The cover is beautiful and it received 5 star reviews and so I bought it. I read the whole thing in one sitting and it seemed as if it were written by and for teenagers! The ink on the pages was splotchy and the print did not line up right. I expected a serious book on perfuming and this just did not deliver :(

Best perfumes listed in it and all are organic too. This has to be the best book out here , loved the lay out of this book and the index material too, all the ingredients listed in every recipe are easily available in my area.
