Eva M. Sherman, Beth L. Martin : Organic Wire and Metal Jewelry: Stunning Pieces Made with Sea Glass, Stones, and Crystals before purchasing it in order to gage whether or not it would be worth my time, and all praised Organic Wire and Metal Jewelry: Stunning Pieces Made with Sea Glass, Stones, and Crystals:

13 of 13 people found the following review helpful. Excellent addition to the jewelry maker's book shelf!By Susan CoffeyI highly recommend this book. It's written for those new to the craft of jewelry making and those with more experience who want to expand their skill set. I have some jewelry making experience and consider my skills intermediate to advanced, and I'm pleased to say this book is now on my book shelf. Beth Martin and Eva Sherman are

excellent teachers and it comes through in this book. They take you from the fundamentals of tools and material choices, to technique basics of a wrapped loop, to texturing, and even the use of a torch. The instructions are clearly written and easy to follow. The projects are beautiful and will offer a chance for those new to jewelry making to expand on the skills you learn as you move from what they designate as beginner to intermediate. Great purchase!

6 of 6 people found the following review helpful. Beautiful, Instructional, Inspirational
By Nancy Petro
This beautifully photographed book provides step-by-step instruction from beginner level to more advanced projects in hand-crafted jewelry using sea glass, stones, and crystals. Having admired and worn Beth Martin's jewelry crafted from sea glass found along the shores of Lake Erie, I thoroughly enjoyed reading about the materials, tools, and skills that combine to make stunning, one-of-a-kind wearable art. This book has everything the beginner needs to produce lovely pieces, and, with 50 different projects, it offers ideas and inspiration for the seasoned and skilled jewelry designer as well.

By K. Kinney
There are some very interesting ideas for jewelry using natural materials. Although I like precise and ordered techniques, I always look to stretch my skills and my comfort zone in jewelry construction. It helps me grow as an artisan. This is that kind of publication, it stretches my skills, my ideas, my general thinking of what is wearable and attractive.

Showcasing gemstones, crystals, sea glass, and pearls, *Organic Wire and Metal Jewelry* offers new ways to incorporate raw materials into beautiful jewelry pieces. Clear, step-by-step instructions and detailed photographs teach readers a variety of basic jewelry techniques and guide even beginner jewelry-makers through each project successfully. Crafters can use the suggested materials or choose to substitute stones or other beads as desired for an endless variety of elegant design possibilities. With a wide range of stylish and organic designs and a photo gallery for extra inspiration, *Organic Wire and Metal Jewelry* provides every wireworker and metalworker with the perfect project.

About the Author
Beth Martin is a popular jewelry design instructor, continually inspiring students to go beyond their comfort level and incorporate beach glass into areas they never considered. Eva Sherman opened Grand River Beads and Gift Gallery in 2005. Her jewelry designs have been published in several different magazines and she has traveled and taught extensively. Both live in Rocky River, OH.
