6 of 6 people found the following review helpful. P-51 Mustang Illustrations and InfoBy CarchopThough small, this is a pretty good little book. Many good illustrations and a few photos, with pilot, country, model and conflict info. Very informative.Found one omission, (9.5 destroyed on ground by Graham in the "Down for Double" in addition to the 7 air kills), but gained plenty of good info.The only thing keeping the rating at 4 instead of 5 stars is the size of the book (8"X 9 1/2").0 of 0 people found the following review helpful. Five StarsBy Cheryl DonlonGood art work, history and technical info. An enjoyable read, and visual treat.0 of 0 people found the following review helpful. very satisfied.By Daris LongFast delivery, very satisfied.

This new addition to the Planes and Pilots series from Histoire Collections has 82 pages packed with full color graphic representations of this great World War II fighter. As with earlier books in the series the emphasis is on the wide range

of markings and the many variants of this aircraft. An essential book for modelers and aviation enthusiasts. Also includes detail of personalized markings and nose art.
