Precious metal clay is an exciting new material made from fine silver dust in a binder that can be used just like ordinary modeling clay. However, once fired, the silver dust fuses together to become pure silver. This unique and versatile material gives crafters of all levels the opportunity to design and create unique silver jewelry--a technique once reserved only for trained silversmiths.

About the AuthorXUELLA ARNOLD trained in 3D design and has been a jewelry designer and maker for seventeen years. As well as exhibiting and selling her designs across the country, she teaches jewelry making with precious metal clay in the southeast of England, where she lives.
